Preface

These Philippine Bidding Documents (PBDs) for the procurement of Goods through Competitive Bidding have been prepared by the Government of the Philippines for use by any branch, constitutional commission or office, agency, department, bureau, office, or instrumentality of the Government of the Philippines, National Government Agencies, including Government-Owned and/or Controlled Corporations, Government Financing Institutions, State Universities and Colleges, and Local Government Unit. The procedures and practices presented in this document have been developed through broad experience, and are for mandatory use in projects that are financed in whole or in part by the Government of the Philippines or any foreign government/foreign or international financing institution in accordance with the provisions of the 2016 revised Implementing Rules and Regulations of Republic Act No. 9184.

The Bidding Documents shall clearly and adequately define, among others: (i) the objectives, scope, and expected outputs and/or results of the proposed contract or Framework Agreement, as the case may be; (ii) the eligibility requirements of Bidders; (iii) the expected contract or Framework Agreement duration, the estimated quantity in the case of procurement of goods, delivery schedule and/or time frame; and (iv) the obligations, duties, and/or functions of the winning bidder.

Care should be taken to check the relevance of the provisions of the PBDs against the requirements of the specific Goods to be procured. If duplication of a subject is inevitable in other sections of the document prepared by the Procuring Entity, care must be exercised to avoid contradictions between clauses dealing with the same matter.

Moreover, each section is prepared with notes intended only as information for the Procuring Entity or the person drafting the Bidding Documents. They shall not be included in the final documents. The following general directions should be observed when using the documents:

- a. All the documents listed in the Table of Contents are normally required for the procurement of Goods. However, they should be adapted as necessary to the circumstances of the particular Procurement Project.
- b. Specific details, such as the “*name of the Procuring Entity*” and “*address for bid submission*,” should be furnished in the Instructions to Bidders, Bid Data Sheet, and Special Conditions of Contract. The final documents should contain neither blank spaces nor options.
- c. This Preface and the footnotes or notes in italics included in the Invitation to Bid, Bid Data Sheet, General Conditions of Contract, Special Conditions of Contract, Schedule of Requirements, and Specifications are not part of the text of the final document, although they contain instructions that the Procuring Entity should strictly follow.

- d. The cover should be modified as required to identify the Bidding Documents as to the Procurement Project, Project Identification Number, and Procuring Entity, in addition to the date of issue.
- e. Modifications for specific Procurement Project details should be provided in the Special Conditions of Contract as amendments to the Conditions of Contract. For easy completion, whenever reference has to be made to specific clauses in the Bid Data Sheet or Special Conditions of Contract, these terms shall be printed in bold typeface on Sections I (Instructions to Bidders) and III (General Conditions of Contract), respectively.
- f. For guidelines on the use of Bidding Forms and the procurement of Foreign-Assisted Projects, these will be covered by a separate issuance of the Government Procurement Policy Board.

Section VII. Technical Specifications

Notes for Preparing the Technical Specifications

A set of precise and clear specifications is a prerequisite for Bidders to respond realistically and competitively to the requirements of the Procuring Entity without qualifying their Bids. In the context of Competitive Bidding, the specifications (*e.g.* production/delivery schedule, manpower requirements, and after-sales service/parts, descriptions of the lots or items) must be prepared to permit the widest possible competition and, at the same time, present a clear statement of the required standards of workmanship, materials, and performance of the goods and services to be procured. Only if this is done will the objectives of transparency, equity, efficiency, fairness, and economy in procurement be realized, responsiveness of bids be ensured, and the subsequent task of bid evaluation and post-qualification facilitated. The specifications should require that all items, materials and accessories to be included or incorporated in the goods be new, unused, and of the most recent or current models, and that they include or incorporate all recent improvements in design and materials unless otherwise provided in the Contract.

Samples of specifications from previous similar procurements are useful in this respect. The use of metric units is encouraged. Depending on the complexity of the goods and the repetitiveness of the type of procurement, it may be advantageous to standardize the General Technical Specifications and incorporate them in a separate subsection. The General Technical Specifications should cover all classes of workmanship, materials, and equipment commonly involved in manufacturing similar goods. Deletions or addenda should then adapt the General Technical Specifications to the particular procurement.

Care must be taken in drafting specifications to ensure that they are not restrictive. In the specification of standards for equipment, materials, and workmanship, recognized Philippine and international standards should be used as much as possible. Where other particular standards are used, whether national standards or other standards, the specifications should state that equipment, materials, and workmanship that meet other authoritative standards, and which ensure at least a substantially equal quality than the standards mentioned, will also be acceptable. The following clause may be inserted in the Special Conditions of Contract or the Technical Specifications.

Sample Clause: Equivalency of Standards and Codes

Wherever reference is made in the Technical Specifications to specific standards and codes to be met by the goods and materials to be furnished or tested, the provisions of the latest edition or revision of the relevant standards and codes shall apply, unless otherwise expressly stated in the Contract. Where such standards and codes are national or relate to a particular country or region, other authoritative standards that ensure substantial equivalence to the standards and codes specified will be acceptable.

Reference to brand name and catalogue number should be avoided as far as possible; where unavoidable they should always be followed by the words “*or at least equivalent.*” References to brand names cannot be used when the funding source is the GOP.

Where appropriate, drawings, including site plans as required, may be furnished by the Procuring Entity with the Bidding Documents. Similarly, the Supplier may be requested to provide drawings or samples either with its Bid or for prior review by the Procuring Entity during contract execution.

Bidders are also required, as part of the technical specifications, to complete their statement of compliance demonstrating how the items comply with the specification.

Technical Specifications

Item	Specification	Statement of Compliance
		<i>[Bidders must state here either "Comply" or "Not Comply" against each of the individual parameters of each Specification stating the corresponding performance parameter of the equipment offered. Statements of "Comply" or "Not Comply" must be supported by evidence in a Bidders Bid and cross-referenced to that evidence. Evidence shall be in the form of manufacturer's un-amended sales literature, unconditional statements of specification and compliance issued by the manufacturer, samples, independent test data etc., as appropriate. A statement that is not supported by evidence or is subsequently found to be contradicted by the evidence presented will render the Bid under evaluation liable for rejection. A statement either in the Bidder's statement of compliance or the supporting evidence that is found to be false either during Bid evaluation, post-qualification or the execution of the Contract may be regarded as fraudulent and render the Bidder or supplier liable for prosecution subject to the applicable laws and issuances.]</i>

XI. EMERGENCY PLAN

This security and emergency plan are the procedures to be followed by the Security Guards during disaster whether natural or man-made calamity.

A. FIRE

Fire will develop when the three elements are present, known as the “Triangle of Fire” namely: fuel, heat and air. If one is absent the fire cannot exist. Fire also has three classifications: they are classified under class A, B and C. In the Philippines, classes A, B or C are common causes of fire. Class A is made of light materials such as papers, wood, and the like. Class B is composed of flammable liquid such as alcohol, gasoline, etc. Lastly, Class C is caused by electrical circuits.

Because of these classifications, manufacturers of fire extinguishers created three types of fire extinguishers.

1. In case of fire, the responding guard shall first determine the cause of fire. After determining, he shall use a fire extinguisher intended for that classification of fire. In using a fire extinguisher, the guard shall remember the “PASS” which means P – pull the pin, A – aim the nozzle, S – squeeze and S – sweep to the base of the fire until it is totally covered.
2. If the fire cannot be stopped, the guard shall immediately push the alarm button. Any guard who hears this alarm shall immediately initiate the following:
 - a. Call the nearest Fire department.
 - b. Secure all entrances and exit doors and allow no one to enter the building except those authorized.
 - c. All emergency exits shall be opened.
 - d. Identify and prepare a safe place for evacuation and for temporary use by the victims.
 - e. Observe any suspicious looking individual who could be a possible arson suspect.
 - f. Record the event of fire from time to time, e.g., color of smoke, speed of fire, location and the origin of fire. This will help fire investigators in locating possible evidence.
3. After the fire is contained and the building is declared safe by firemen, guards will allow no one to enter the gutted building except those authorized.

B. BOMB THREATS

Bomb threats are usually received through telephone. Experts say that 99% of which are hoax and only 1% is positive. In this kind of situation, precautionary measures shall be immediately initiated.

In case of bomb threat, the following shall be done by the security guards assigned at PSHS-MC & PSHS-OED.

1. To avoid panic among the employees inside the building, security guards shall use coded messages in their radio communication.

2. Security Officer shall standby near the telephones to receive calls and take note of the following when another call is received. Encourage the caller to talk and if possible, ask the caller for the location of the bomb.
 - a. The gender of the caller.
 - b. Determine whether it is a serious or prank call
 - c. Take note of the background noise heard on the phone.
 - d. Other matters that will lead to identify/locate the caller.
3. Coordinate with the local law enforcement authorities, call the bomb disposal units and inform the fire department.
4. Tighten security measures by implementing luggage control and body frisking.
5. Cordon the area that is being identified by the caller and as much as possible know the location of the bomb.
6. Execute an immediate search of the area if there is still enough time.
7. If the bomb is found, do not touch it, cordon the area. There may be tiny wires that may trigger the bomb to explode.
8. Evacuate people in the nearby places that may be reached by the explosion.
9. If the bomb squad expert already defused the bomb, execute a search for the second time to clear the area allowing nobody to enter the place.

C. TYPHOONS

Typhoons can be monitored through news reports. This kind of calamity may cause loss of properties and even lives. Security personnel must follow these instructions:

1. Observe the surroundings and detect possible danger from fall branches or any object placed on a higher ground.
2. If the area is flooded, check if the water reaches the electrical outlets, if so; inform the maintenance section to switch-off the power line.
3. Prepare all emergency lights for possible power cut-off.
4. Locate safe places for evacuation in case the situation worsens.
5. Monitor radio news reports to be up-dated of the situation.

6. After the typhoon, request maintenance personnel to inspect all electrical lines especially plugs in the lower level for possible danger.

D. EARTHQUAKE

Earthquakes are natural hazards and cannot be predicted. Our priority concern here is to set in place procedures of how we can help mitigate or prevent damages to a minimum level:

1. During earthquakes one must remain calm and avoid panic.
2. When one is inside the building, he/she shall avoid using the elevator because chances are there might be power failures and he might be trapped inside.
3. Stay away from electrical cable and wires because this might erupt and can cause electrical shocks.
4. If necessary, stay under the table or anything that shall give your head ample protection from falling debris.
5. Guard on post must immediately assist to the best of his ability to protect and evacuate to a safer area the concerned VIPs and employees of PSHS-MC & PSHS-OED.
6. Send immediately those employees hurt in the course of the quake to the nearest hospital.
7. Search for other persons left in the building after evacuation and report all damages in properties and injured persons to the Incident Commander.

In case of an earthquake, security guards are expected to act as first responders; therefore, they must have undergone the basic course in basic life support or first aid.

E. THEFT/ROBBERY

1. Upon receiving a complaint for loss of properties, the supervisor shall immediately proceed to the scene of the crime for possible preservation and recovery of traces of evidence.
2. If possible, take a photograph of the scene, but do not touch anything.
3. List down personnel present during the discovery of the loss.

4. Conduct initial inquiry to the informant and other personnel that may have knowledge about the case.
5. Summon assistance from the security agency investigators if the need arises.
6. Blot the incident with the nearest police station that has jurisdiction of the place.
7. Prepare Incident Report and submit the same to the Security Officer for proper coordination, conduct investigation of the case and submit progress reports.

In case of disagreement or controversy regarding the restitution of any property lost, damaged or destroyed during the term of the Contract, PSHS MC and/or PSHS-OED shall create an Investigation Committee composed of two (2) officials from the PSHS-MC and/or PSHS-OED, and one (1) from the Security Agency, whose decision shall be final unless otherwise reversed by the Head of the Procuring Entity.

Immediately after it has been determined that the Security Agency, through its security personnel, is at fault, the Security Agency shall immediately pay PSHS-MC and/or PSHS-OED the cost of the lost items, otherwise, PSHS-MC and/or PSHS-OED shall withhold such amount from the Security Agency's billings

F. PICKET/STRIKE

In the event of any projected strike or work stoppage in the office, the following course of action is highly recommended:

Pre-strike procedure:

1. The Detachment Commander/Shift-in-Charge of the security agency are enjoined to exert their utmost effort to distract any possible plans that striking group/union contemplates to undertake.
2. Gather information, demands and complaints of employees' union against the management. Collect possible issues, points of the compromise advanced by management, the attitude of the labor and management and the number of sympathizers of the striking group.
3. Determine whether the impending strike is purely a result of a legitimate labor dispute or merely a front to create commotion and discontent.
4. Conduct a reconnaissance of the whole area to be covered by the security personnel, plan probable troop disposition, and screen personnel to be utilized for duty in case the strike is staged.

On-going Strike:

1. Notify the management or its authorized representatives.
2. Keep in contact with the management for further instructions.
3. Request for additional security guards to enforce perimeter guards to prevent possible looting, sabotage and vandalism.
4. Coordinate with management regarding the need for detail of policemen at the strike area to maintain peace and order.

G. HOSTAGE TAKING SITUATION

Hostage taking situation is a complicated case, so we normally course the handling of the case to an expert of the PNP or other law enforcement agency with expertise in this kind of situation. However, the guards in the area of responsibility facing this kind of situation can help by doing the following:

1. Guards shall immediately notify PSHS-MC & PSHS-OED management and at the same time the nearest PNP unit of the hostage situation for immediate help.
2. Guards must keep the line of communication open for the hostage taker and if necessary, the hostage victim in order to determine the motive and purpose of the hostage taker.
3. Guards must avoid being reckless and avoid any confrontational approach with the suspect.
4. Guards on duty shall not allow other people to intervene, it might worsen the situation. Wait for the arrival of the PNP personnel and other government authorities who are experts in crisis management for hostage taking.
5. Guards must coordinate with the PNP personnel and Crisis Management Team for any information that was gathered.

H. COUP DE' ETAT

This situation is of national security concern. The security force in the area must not cooperate with the rebel group. The guard must immediately inform the PSHS-MC & PSHS-OED management as well as his agency of the situation they have encountered.

Since this is a priority concern, at the direction of the Director or his duly authorized representative, all security personnel shall implement the special course of action by evacuating PSHS-MC & PSHS-OED personnel to safer areas. Immediately, sound the

alarm and call for an emergency situation, through the use of radio communication. The guard shall immediately relay the message of concern to his supervisors.

TRAFFIC PLAN FOR NORMAL AND EMERGENCY SITUATION

1. For normal situations, the rules and regulations on pedestrian and vehicle traffic shall be strictly implemented such as car pass/sticker, speed limit, designated parking and no parking areas, overnight parking. To prevent parking spaces to deplete, owners of vehicles who intend to park their vehicles overnight must secure approval from the Campus Director.
2. For emergency situations, like a demonstration or rally being held within the premises or premises of PSHS-MC & PSHS-OED, security personnel shall initiate action that will preempt a condition of chaos or mob rule. In the event PSHS-MC & PSHS-OED management will request for additional security personnel, the Security Agency will immediately dispatch the number of security guards requested to control the crowd, especially those who shall force their way to enter in order to sow chaos and disorderly conduct.
3. During emergency situations, all stay-in off-duty security guards shall be utilized to help stop on-going disturbance.
